## └─ Configuring Slurm policies

### └─ Slide title

This is my note.

- It can contain Markdown
- like this list

# OpenHPC: Beyond the Install Guide

└─ Configuring Slurm policies

└─ Sample slide

This is my note.

- It can contain Markdown
- like this list

## Left column

This slide has two columns. They don't always have to have columns. It also has a titled block of content in the left column. Make sure you've always got a `::: notes` block after the slide content, even if it has no content.

Use `#` and `##` headers in the Markdown file to make level-1 and level-2 headings. `###` headers to make slide titles, and `####` to make block titles.
