Making better nodes
Managing system complexity
Configuring Slurm policies

Sample slide

Left column

This slide has two columns. They don't always have to have columns. It also has a titled block of content in the left column. Make sure you've always got a ::: notes block after the slide content, even if it has no content.

Use # and ## headers in the Markdown file to make level-1 and level-2 headings, ### headers to make slide titles, and #### to make block titles.
